1. *Pharmaceutical industry* – The pharmaceutical industry is the largest of the three industries, with sales of \$10.5 billion in 1997. It is the only industry that has a significant presence in all three markets. The industry is dominated by a few large firms, with the top five firms accounting for 40% of sales. The industry is highly competitive, with many firms competing for market share. The industry is also highly regulated, with strict rules governing the development and marketing of drugs.

The graph illustrates a negative linear correlation between the number of days of rain and the number of days of sunshine. As the number of rainy days increases, the number of sunny days decreases proportionally. The data points form a straight line with a negative slope, starting at (0, 10) and ending at (10, 0).
